

# Winter weather fun

## Snow angels

Lie down in the snow and move your arms and legs back and forth to create your angel shape. Explore your surroundings to find your chosen stick, use it to draw your own angel wing designs, create pretty patterns and draw your favourite shapes in the snow. You could even collect some nature objects and give your angel a crown. Leave your snow art for others to find and enjoy!

Draw your designs with your chosen stick

## Ice decorations

Create your own ice sculpture decorations to hang outside for wildlife to enjoy! Use a mould of your choice, we suggest a bowl with a glass in the middle to create a hole for a wreath design. You can also use things like old yogurt pots and silicone ice cube trays. Add your chosen decorations like seeds, leaves and berries, then fill with water. Either pop your creation in the freezer overnight or if it's cold enough, you can leave it outside for mother nature to freeze for you. Tie some string or twine around your frozen wreath and hang from a tree in your garden or local green space.

Stick and twigs for ears and whiskers

Seeds

Leaves and twigs

Berries and fruit

Stones for eyes

## Snow animals

Try creating snow animals instead of snow people. Collect some nature objects to help create your chosen animals features. We have made a snow cat decorated with stones and sticks.

## Snow drawing

Using the snow as your canvas, you can create some amazing colourful art work using water and a few drops of natural food colouring. All you need is a selection of food colouring colours, bowls of water to mix your colours in and something to paint with. We suggest some paint brushes or a pipette. You can make a rainbow, draw nature shapes, create the solar system or go abstract!

Make sure you wash your hands afterwards and ask for help from an adult.

We would love to see what you create! Make sure you tag and share with us on social media.
